INSTALLATION & MAINTENANCE

Dry cleaning is the best way to clean wood floors, rather than wet cleaning. Vacuum regularly and occasionally use a damp, well wrung-out cloth mop with BONA Floor cleaner. Floor should dry within one minute if used proper amount of cleaner.

■ See the installation manual for more details.

ACCLIMATION

The wood floor needs to be acclimated on site for 7 - 14 days depending upon the moisture content of the planks, subfloor and the environment it will be performing in. See the installation manual for more details.
